EDUCATION

Queensland University of Technology, Brisbane

February, 2018 - August, 2024

Bachelor of Information Technology and Creative Industries in Computer Science & Visual Communication

SKILLS

Web Design / Development: Proficient in UI/UX design and responsive web development using Figma, Webflow, WordPress, Shopify, and custom coding.

Development: Experience with front-end (HTML, CSS, JavaScript, React, Next.js, TypeScript) and back-end technologies (ASP.NET, MySQL).

Algorithm Development / Optimisation: Experience with developing and optimizing algorithms for enhanced performance, particularly in robotics and web applications.

Object-Oriented Programming (OOP): Knowledge of Python, CSharp, and Java for building scalable and maintainable software solutions.

Parallel Computing / Performance Optimization: Knowledge of optimizing system performance through parallel computing and real-time system improvements.

Adobe Creative Suite: Expertise in using Photoshop, Illustrator, InDesign, and After Effects for graphic design, photo editing, and animation.

Graphic / Visual Design: Adept at creating visually engaging designs with a focus on branding and user experience.

Brand Identity / Digital Marketing: Experience in developing cohesive brand identities and implementing digital marketing strategies.

Project / Client Management: Skilled in managing projects, client communication, and ensuring timely delivery.

A/B Testing / Data-Driven Design Decisions: Implemented A/B testing to optimize user experience and improve conversion rates..

EXPERIENCE

Beinc.

March, 2024 - January, 2025

Web Designer/Developer

Kelvin Grove, Brisbane

- Designed high-fidelity prototypes and user interface (UI) components in Figma to enhance user experience and maintain visual consistency across company and client projects.
- Developed and deployed the company's website on Webflow, ensuring and optimised, responsive, and visually appealing digital presence. (www.beinc.com.au)
- Engineered and implemented websites based on wireframes using platforms such as Webflow, Shopify, WordPress, and Squarespace, as well as custom coding to meet project specifications.
- Worked closely with clients to understand their needs, align designs with brand identity, and deliver tailored, user-centric solutions.

Capstone Project

July, 2023 - June, 2024

Software Developer

QUT, Brisbane

- Developed a dynamic HTML-based user interface using ASP.NET to display personalised user information according to access control levels.
- Designed and implemented a skills management system, allowing users to add, edit, and manage their skill sets through an intuitive and interactive web interface.

Normal Korea Robotics

Robotic Programming Intern / Translator

June 2023 - July 2023

Seoul, South Korea

- Acquired hands-on experience in robotic programming using the KAIRO language, contributing to the development of industrial automation solutions.
- Assisted the Iterative Learning Control (ILC) development team in optimising robotic motion algorithms for enhanced precision and efficiency.
- Collaborated with KEBA Austria as both a developer and translator, facilitating technical discussions and cross-border development efforts during an on-site visit to their headquarters.

Eighty8 Media

Graphic Design Intern

May 2021 - July 2021

Brisbane, QLD

- Engaged directly with clients to gather project requirements, define project scopes, and manage milestone deliveries.
- Designed high-quality promotional materials, ensuring alignment with brand identity and marketing objectives.
- Developed visually compelling graphics and content for social media campaigns, enhancing audience engagement and brand presence.

Korean Augmentation to the United States Army (KATUSA)

Administrative Clerk

January 2019 - August 2020

Dongducheon-si, South Korea

- Managed and maintained military personnel records, ensuring compliance with administrative policies and document retention standards.
- Utilised military office management software to track, update, and manage operational data for the Army base.
- Processed and maintained both physical and digital records, ensuring accurate and up-to-date documentation for administrative and operational use.
- Responded to superior officers' requests by retrieving and analyzing records, files, and other critical documents.
- Coordinated with the U.S. Army on various joint training exercises and inter-organizational events, facilitating seamless collaboration between South Korean and U.S. military personnel.

TECHNICAL STRENGTHS

Computer Languages

C, C Sharp, Python, HTML, CSS, React, Next.js

Protocols & APIs

XML, JSON

Databases

MySQL

Adobe Creative Clouds

Illustrator, Photoshop, xd, Premiere Pro

Web design/development

Figma, Webflow, Shopify, Wordpress, Squarespace
